Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 April 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

1. Claims 1-7 and 9-19 are pending.

Election/Restrictions

2. This application contains claims directed to the following patentably distinct species:

Species I: A method of developing a product wherein the characteristic product quality values are determined from the modified characteristic component quality values using an evaluation, the evaluation including at least one of empirical estimating, mathematical models and simulation (claim 2).

Species II: A method of developing a product wherein the characteristic product quality values are determined by direct measuring and/or testing on the product (claim 3).

Species III: A method of developing a product wherein the characteristic product quality values of manufacturers of the components are considered in the definition of the components (claims 5-7, 9, and 10).

Species IV: A method of developing a product wherein the characteristic product quality values are confirmed by an accredited test laboratory (claim 13).

Species V: A method of developing a product wherein the characteristic product quality values are not determined by direct measurement and/or testing (claim 15).

Species VI: A method of developing a product wherein characteristic values for CE marking, for UL approval, for NEBS approval, country-specific standards, on the permissible fire load and on electromagnetic compatibility, and/or special customer requirements for characteristic quality values are taken into consideration when establishing the characteristic product quality values (claim 18).

The species are independent or distinct because the specification discloses the species as potentially separately patentable. Each species is disclosed as potentially mutually exclusive. Since the claims recite each species separately (i.e., without referencing any permutation of the specification that combines more than one of the claimed embodiments), the Applicant is effectively asserting each species to be separately patentably, as claimed.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 4, 11, 12, 14, 16, 17, and 19 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Susanna M. Diaz whose telephone number is (571) 272-6733. The examiner can normally be reached on Monday-Friday, 10 am - 6 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tariq Hafiz can be reached on (571) 272-6729. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
